

You need to install the latest SkechUcation ExtensionStore.

It is also a nice extension manager, by the way.

- 1- Go to www.sketchucation.com
- 2- Register as a member. (there is a free account if you wish).
- 3- Click the Resources tab, then Plugin Store download.
Note where it is downloaded.
- 4- In Sketchup, open the Extension manager, hit the red **Install** button at the bottom
and find the SketchUcationTools.rbz file.
- 5- On the new toolbar click the first icon and enter the very same info you gave at registration.

You can download and update extensions with this.

I hope you have fun with my extension. :-)

Mario C.
