Component:

One folder: **Artlantis Export**

Installation:

Put **Artlantis Export** folder into the **Plug-Ins*** folder of Vectorworks.

* Important:

- 1- The **Artlantis Export** folder **must** be placed into the **Plug-Ins** folder.
- 2- Copy integrally **Artlantis Export** folder. Do not copy the elements separately.
- 3- Do not keep or rename an old **Artlantis Export** folder.

Windows platform:

Component:

One file **Catl6.5.dll** and one folder **Artlantis Export**.

Installation:

- 1- Put the file **Catl6.5.dll** at the first level of the Vectorworks folder
- 2- Put **Artlantis Export** folder into the **Plug-Ins*** folder of Vectorworks.

* Important:

- 1- The **Artlantis Export** folder **must** be placed in the **Plug-Ins** folder.
- 2- Copy integrally **Artlantis Export** folder. Do not copy the elements separately.
- 3- Do not keep or rename an old **Artlantis Export** folder.

3- Launch Vectorworks

In Vectorworks display the Workspace Editor
Please refer to the Vectorworks documentation.

Choose among one of the 3 displayed options.

The Workspace Editor dialog is displayed.
Click on the **Menus** thumbnail the left column displays the list of the **Commands**, and the right column the lists of the **Menus**.

- In the right column, click on **the arrow** in front of **File** then click on the arrow in front of **Export**.
- in the left column, click on the arrow in front of **Import/Export**.
- Select the **Artlantis Export...** item then drag and drop it to the right column just under the item **Export***.
Click **OK** to validate and close the dialog.

Then check that the new command is available menu **File > Export > Artlantis Export**.

4- Limitations and warnings

Please do not use older plug-ins with VectorWorks 2017 as they are not compatible. They might interfere with the new plug-in.
