The screenshot shows the GitHub repository page for 'swei-bow-sans'. The repository is public and has 2 stars and 0 forks. The main content is the README.md file, which describes the font family. The README is written in Chinese and mentions that the font is derived from Noto Sans CJK and思源黑體 (Source Han Sans). It highlights that the font is more concise and modern, and is based on modifications to思源黑體 (Source Han Sans). The README also states that the font is free for commercial use and encourages users to freely use, optimize, and modify it. The font's characteristic is described as a combination of rounded and black styles, with a specific detail about the top edge of the character '口' (kǒu) having a small dot resembling a rainbow shape. The README also compares the font to '獅尾寬腿黑體' (Shiwei Wide Leg Black Body) and explains the difference in the '拔腳' (bajiao) feature, which refers to the removal of short lines from the bottom corners of characters like '口' to prevent imbalance and misalignment.

## 獅尾寬黑體 Swei Bow Sans

獅尾寬黑體基於思源黑體的上半邊變圓和拔腳改造，更加簡明現代化的字體。支援簡體中文、繁體中文、韓文與日文；**可以免費商用，歡迎大家自由應用、自由優化、自由改作！**

獅尾寬黑體的特色是，上半邊圓體+下半邊黑體，一個綜合的字體，「口」字的上沿有一點點像彩虹形狀。

「獅尾寬黑體」與「獅尾寬腿黑體」差別在有沒有拔腳，「拔腳」就是會有較少的筆畫，例如移除「口」字的左右下角會多出的短線條。有拔腳的字會較圓，但是會造成有些字因直接去掉腿後左右不平衡、左右不對襯的「懸空」問題。改使用「腿」系列字體就不會有
